Graphite pencil on paper, framed
40 × 240 cm (framed 49 × 249 × 4 cm)

As a sketch, one curved line is drawn with the left hand from left to right over a long piece of paper, the other is drawn with the right hand from right to left. Then both the dark and the light strand are formed along both lines, as a process of caring for the lines.

Chalk on the ground (paving stones)
ca. 20 × 12 m

As part of a pop-up exhibition, fourteen chalk lines are drawn on the square as an optical experiment. The lines run at a certain angle to each other, so that from one of the two directions before crossing the square, the distances between the lines seem to be the same in the front and in the back.

Wandering island 7

2022
Graphite pencil on paper
40 × 25 cm (10×)

Based on geographical forms of various Central European islands and coastal sections such as the East Frisian Islands, Sylt, Vorpommersche Boddenlandschaft or Heligoland and Dune, coastal dynamic processes of abrasion and accumulation are simulated on imaginary islands. In each series shape and position of the island changes constantly according to these processes, so that human structures such as huts and piers after some time find themselves at the other end of the island, are washed away by the sea and have to be rebuilt somewhere else.

Crystallization 1 – 9

2021
 Graphite pencil and watercolour on paper
 70 × 100 cm (3×), 100 × 70 cm (6×)

Two layers are connected to each other by points arranged in regular intervals. Through these points, within the system of both layers, a constant mass exchange takes place. For each tunnel point only one direction of mass transfer is possible, so that on each layer overlapping force fields around the centers of the tunnel points appear and form a pattern of suction and pressure.

Depending on the direction of the impulse, the loops of a single strand expand or contract. For each of the seven (loop) positions of the strand, one of three movement options (+1; 0; -1) is chosen randomly and executed in the next step. This is repeated so that the shape of the entire strand is constantly changing. The two loops at the outermost ends of the strand have the tendency to expand far, while the available strand length remains the same, thus constricting the loops in-between in the long-term.

Sketch of a polarized world 1 – 40

2020-2021

Graphite pencil, coloured pencil and fineliner on paper

29,6 x 41,9 cm (14x), 41,9 x 29,6 cm (16x), 41,9 x 59,3 cm (3x), 59,3 x 41,9 cm (4x), 59,3 x 84,1 cm (1x), 70 x 100 cm (1x), 80 x 50 cm (1x)

Parallel to existing schemes such as the Western scientific (physical), religious and other systematizing worldviews a system is constructed in which interactions between polarities are explored. Two poles are mirrored at a point equidistant from each of them and, in a series of further reflections, result in a strand consisting of two spirally wound partial strands forming loops, with each pair of poles either striving towards each other or apart. Several strands, distanced from each other according to certain geometric rules, form the first layer of the system. Offset to this there is a second layer. Both layers are connected to each other via the centers of the loops, so that a constant mass exchange takes place according to forces of suction and pressure.

Oil on chipboard
60 × 60 × 1 cm

Based on experiences of a meditative state, four inner pictures are painted in the form of large panel paintings. The paint is partly applied with the hands, so that a physical connection is experienced again. The works can be read as maps, floor plans or cave cross-sections, in which the recipient locates himself.

Education

since 2023 Master of Fine Arts, Prof. Jorinde Voigt, Hochschule für Bildende Künste Hamburg
The Margaret Trowell School of Industrial and Fine Art, Makerere University, Kampala (Uganda), through the Art School Alliance (ASA) exchange program, Aug. – Dec. 2025

2018 – 2023 Bachelor of Fine Arts, Prof. Jorinde Voigt (seit 2019), Hochschule für Bildende Künste Hamburg [Bachelor thesis: *Die multipolare Ebene*]

2014 – 2017 Biology und Geography, Universität Hamburg

Practical experience

2023 – 2025 Student assistant (tutor) for Prof. Jorinde Voigt's class at Hochschule für Bildende Künste Hamburg

Scholarships and awards

2025 Art School Alliance (ASA) scholarship, HFBK Hamburg
City Kunstpreis Hamburg, Carolina d'Amico Stiftung, Förderpreis

2024/2025 Deutschlandstipendium

Solo exhibitions

2022 Klub der Künste OffSpace, Deichtorhallen Hamburg

Group exhibitions (selection)

2025 'Aus der Spur', Schloss Agathenburg, Agathenburg
ASA Open Studios, Karolinenstraße/Hochschule für Bildende Künste Hamburg

2024 'start56', gopea-Kunstraum, Burg Bentheim

2023 'Heavy Match' with Prof. Jorinde Voigt's class at Wiensowski & Harbord, Berlin
Graduate show, Hochschule für Bildende Künste Hamburg

2022 Annual exhibition, Hochschule für Bildende Künste Hamburg

2021 Annual exhibition, Hochschule für Bildende Künste Hamburg

2020 Annual exhibition, Hochschule für Bildende Künste Hamburg

Collaborations

2022 Feature of selected works in a film scene in the short film 'Kreuzende Linien' by Elena Pilar Nyffeler, Hamburg Media School
